PROFILE

I'm an Industrial designer, passionate about processes and design methodologies. I really care about solving problems in a creative ways, generatin different kind of ideas and following the tasks after. I characterize myself as a creative person, who is open to learn fast, a person who listens to instructions. I'm also good at team work and also good at finding opportunities. I have focused my studies and my experience in CX and UX, where I have learned about Customer centered design, analysis of Customer Experience scores and CX methods
